

(1) **HERITAGE AREA.**—The term “Heritage Area” means the Land Between the Rivers National Heritage Area established by section 4(a).

(2) **MANAGEMENT ENTITY.**—The term “management entity” means the management entity for the Heritage Area designated by section 4(c).

(3) **SECRETARY.**—The term “Secretary” means the Secretary of the Interior.

(4) **STATE.**—The term “State” means the State of Illinois.

SEC. 4. LAND BETWEEN THE RIVERS NATIONAL HERITAGE AREA.

(a) **ESTABLISHMENT.**—There is established in the State the Land Between the Rivers National Heritage Area.

(b) **BOUNDARIES.**—The Heritage Area shall include—

(1) Kincaid Mound, Fort de Chartres, Kaskaskia, Fort Massac, Wilkinsonville Contonment, the Lewis and Clark Sculpture, Flat Boat, Cave-in-Rock, the Shawneetown Bank Building, the Iron Furnace, the Crenshaw “Slave House,” Roots House, the site of the Lincoln-Douglas debate, certain sites associated with John A. Logan, the Fort Defiance Planning Map, Mound City National Cemetery, and Riverlore Mansion; and

(2) any other sites in Randolph, Perry, Jefferson, Franklin, Hamilton, White, Jackson, Williamson, Saline, Gallatin, Union, Johnson, Pope, Hardin, Alexander, Pulaski, and Massac Counties in the State that the Secretary, in consultation with the management entity, determines to be appropriate for inclusion in the Heritage Area.

(c) **MANAGEMENT ENTITY.**—The management entity for the Heritage Area shall be the Southern Illinois University Carbondale.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 114—RECOGNIZING THE CONTRIBUTIONS OF AGRICULTURAL PRODUCERS IN PENNSYLVANIA AND THROUGHOUT THE NATION ON THE OCCASION OF NATIONAL AGRICULTURE DAY

Mr. CASEY (for himself and Mr. SPECTER) submitted the following resolution; which was referred to the Committee on Agriculture, Nutrition, and Forestry:

S. RES. 114

Whereas National Agriculture Day is an annual celebration during which government agencies, community members, and agricultural groups work with agricultural producers to honor the importance of the agriculture industry;

Whereas agriculture is a pillar of the economy of the Commonwealth of Pennsylvania and many other States across the country;

Whereas agriculture is the number one industry in Pennsylvania and has contributed more than \$45,000,000,000 to the economy of the Commonwealth;

Whereas agricultural producers in Pennsylvania export a considerable amount of food and agricultural and forest products, earning more than \$1,500,000,000 annually in profits;

Whereas dairy cattle from Pennsylvania are used as breeding stock in a number of countries around the world;

Whereas Pennsylvania is the home of over 58,000 farms, covering more than 7,700,000 acres of land;

Whereas Pennsylvania is a leading producer of mushrooms, eggs, pumpkins, apples, grapes, freestone peaches, ice cream, milk

cows, chickens, and other agricultural products and livestock;

Whereas each agricultural producer in the United States feeds more than 144 people and Pennsylvania’s agricultural producers are responsible for feeding more than 8,000,000 mouths worldwide;

Whereas agricultural producers in Pennsylvania and throughout the Nation provide the people of the United States with food, clothes, and many other staples; and

Whereas the contribution of agricultural producers in Pennsylvania and throughout the United States should be honored with highest praise and respect: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes—

(A) that agriculture is the number one industry in Pennsylvania;

(B) the outstanding contribution of Pennsylvania’s agricultural producers to the economy of the Commonwealth and the Nation; and

(C) that agriculture in Pennsylvania is diverse and provides important nutrition to the people of the United States; and

(2) pays tribute to agriculture and agricultural producers in Pennsylvania and throughout the United States on the occasion of National Agriculture Day.

SENATE RESOLUTION 115—URGING THE GOVERNMENT OF CANADA TO END THE COMMERCIAL SEAL HUNT

Mr. LEVIN submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 115

Whereas on November 15, 2006, the Government of Canada opened a commercial hunt for seals in the waters off the east coast of Canada;

Whereas an international outcry regarding the plight of the seals hunted in Canada resulted in the 1983 ban by the European Union of whitecoat and blueback seal skins and the subsequent collapse of the commercial seal hunt in Canada;

Whereas the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) bars the import into the United States of any seal products;

Whereas in February 2003, the Ministry of Fisheries and Oceans in Canada authorized the highest quota for harp seals in Canadian history, allowing nearly 1,000,000 seals to be killed over a 3-year period;

Whereas more than 1,000,000 seals have been killed over the past 3 years;

Whereas harp seal pups can be legally hunted in Canada as soon as they have begun to molt their white coats at approximately 12 days of age;

Whereas 95 percent of the seals killed over the past 5 years were pups between just 12 days and 12 weeks of age, many of which had not yet eaten their first solid meal or taken their first swim;

Whereas a report by an independent team of veterinarians invited to observe the hunt by the International Fund for Animal Welfare concluded that the seal hunt failed to comply with basic animal welfare regulations in Canada and that governmental regulations regarding humane killing were not being respected or enforced;

Whereas the veterinary report concluded that as many as 42 percent of the seals studied were likely skinned while alive and conscious;

Whereas the commercial slaughter of seals in the Northwest Atlantic is inherently cruel, whether the killing is conducted by clubbing or by shooting;

Whereas many seals are shot in the course of the hunt, but escape beneath the ice where they die slowly and are never recovered, and these seals are not counted in official kill statistics, making the actual kill level far higher than the level that is reported;

Whereas the commercial hunt for harp and hooded seals is a commercial slaughter carried out almost entirely by non-Native people from the East Coast of Canada for seal fur, oil, and penises (used as aphrodisiacs in some Asian markets);

Whereas the fishing and sealing industries in Canada continue to justify the expanded seal hunt on the grounds that the seals in the Northwest Atlantic are preventing the recovery of cod stocks, despite the lack of any credible scientific evidence to support this claim;

Whereas 2 Canadian government marine scientists reported in 1994 that the true cause of cod depletion in the North Atlantic was over-fishing, and the consensus among the international scientific community is that seals are not responsible for the collapse of cod stocks;

Whereas harp and hooded seals are a vital part of the complex ecosystem of the Northwest Atlantic, and because the seals consume predators of commercial cod stocks, removing the seals might actually inhibit recovery of cod stocks;

Whereas certain ministries of the Government of Canada have stated clearly that there is no evidence that killing seals will help groundfish stocks to recover; and

Whereas the persistence of this cruel and needless commercial hunt is inconsistent with the well-earned international reputation of Canada: Now, therefore, be it

Resolved, That the Senate urges the Government of Canada to end the commercial hunt on seals that opened in the waters off the east coast of Canada on November 15, 2006.

Mr. LEVIN. Mr. President, Canada’s commercial seal hunt is the largest slaughter of marine mammals in the world. According to the Humane Society of the United States (HSUS), over one million seals have been killed for their fur in the past three years. In 2006 alone, more than 350,000 seals were slaughtered, most of them between 12 days and 12 weeks old.

Canada officially opened another seal hunt on November 15, 2006, paving the way for hundreds of thousands of baby seals to be killed for their fur during the spring of 2007. Today, I am joined by Senator COLLINS and Senator BIDEN in submitting a resolution that urges the Government of Canada to end this senseless and inhumane slaughter.

A study by an independent team of veterinarians in 2001, found that the seal hunt failed to comply with basic animal welfare standards and that Canadian regulations with regard to humane killing were not being enforced. The study concluded that up to 42 percent of the seals studied were likely skinned while alive and conscious. The United States has long banned the import of seal products because of widespread outrage over the magnitude and cruelty of the hunt.

It makes little sense to continue this inhumane industry that employs only a few hundred people on a seasonal, part-time basis and only operates for a few weeks a year, in which the concentrated killings takes place. In Newfoundland, where over 90 percent of the

hunters live, the economic contribution of the seal hunt is marginal. In fact, exports of seal products from Newfoundland account for less than one-tenth of one percent of the Province's total exports.

Canada is fortunate to have vast and diverse wildlife populations, but these animals deserve protection, not senseless slaughter. Americans have a long history of defending marine mammals, best evidenced by the Marine Mammal Protection Act of 1972. Polls show that close to 80 percent of Americans and the vast majority of Europeans oppose Canada's seal hunt. In fact, close to 70 percent of Canadians surveyed oppose the hunt completely, with even higher numbers opposing specific aspects of the hunt, such as killing baby seals.

The U.S. Government has opposed this senseless slaughter, as noted in the attached, January 19, 2005, letter from the U.S. Department of State, in response to a letter Senator COLLINS and I wrote to President Bush, urging him to raise this issue during his November 30, 2004, visit with Canadian Prime Minister Paul Martin.

The clubbing of baby seals can not be defended or justified. Canada should end it, just as we ended the Alaska seal hunt more than 20 years ago.

I ask unanimous consent that the January 19, 2005, letter from the U.S. State Department be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, DC, January 19, 2005.

Hon. CARL LEVIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR LEVIN: This is in response to your letter to the President of November 24, 2004, regarding Canadian commercial seal hunting. The White House has requested that the Department of State respond. We regret the delay in responding. Unfortunately, this letter was not received in the Department of State until mid-December, well after the referenced meeting between President Bush and Prime Minister Paul Martin of Canada.

We are aware of Canada's seal hunting activities and of the opposition to it expressed by many Americans. Furthermore, we can assure you that the United States has a long-standing policy opposing the hunting of seals and other marine mammals absent sufficient safeguards and information to ensure that the hunting will not adversely impact the affected marine mammal population or the ecosystem of which it is a part. The United States policy is reflected in the Marine Mammal Protection Act of 1972 (MMPA) which generally prohibits, with narrow and specific exceptions, the taking of marine mammals in waters or lands subject to the jurisdiction of the United States and the importation of marine mammals and marine mammal products into the United States.

The United States has made known to the Government of Canada its objections and the objections of concerned American legislators and citizens to the Canadian commercial seal hunt on numerous occasions over recent years. The United States has also opposed Canada's efforts within the Arctic Council to promote trade in sealskins and other marine mammal products.

We hope this information is helpful to you. Please do not hesitate to contact us if we can be of assistance in this or any other matter.

Sincerely,

NANCY POWELL,
(For Paul V. Kelly, Asst. Secretary, Legislative Affairs).

SENATE RESOLUTION 116—DESIGNATING MAY 2007 AS “NATIONAL AUTOIMMUNE DISEASES AWARENESS MONTH” AND SUPPORTING EFFORTS TO INCREASE AWARENESS OF AUTOIMMUNE DISEASES AND INCREASE FUNDING FOR AUTOIMMUNE DISEASE RESEARCH

Mr. BIDEN submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 116

Whereas autoimmune diseases are chronic, disabling diseases in which underlying defects in the immune system lead the body to attack its own organs and tissues;

Whereas autoimmune diseases can affect any part of the body, including the blood, blood vessels, muscles, nervous system, gastrointestinal tract, endocrine glands, and multiple-organ systems, and can be life-threatening;

Whereas researchers have identified over 80 different autoimmune diseases, and suspect at least 40 additional diseases of qualifying as autoimmune diseases;

Whereas researchers have identified a close genetic relationship and a common pathway of disease that exists among autoimmune diseases, explaining the clustering of autoimmune diseases in individuals and families;

Whereas the family of autoimmune diseases is under-recognized, and poses a major health care challenge to the United States;

Whereas the National Institutes of Health (NIH) estimates that autoimmune diseases afflict up to 23,500,000 people in the United States, 75 percent of the people affected are women, and the prevalence of autoimmune diseases is rising;

Whereas NIH estimates the annual direct health care costs associated with autoimmune diseases at more than \$100,000,000,000 and there are over 250,000 new diagnoses each year;

Whereas autoimmune diseases are among the top 10 leading causes of death in female children and adult women;

Whereas autoimmune diseases most often affect children and young adults, leading to a lifetime of disability;

Whereas diagnostic tests for most autoimmune diseases are not standardized, making autoimmune diseases very difficult to diagnose;

Whereas, because autoimmune diseases are difficult to diagnose, treatment is often delayed, resulting in irreparable organ damage and unnecessary suffering;

Whereas the Institute of Medicine of the National Academies reported that the United States is behind other countries in research into immune system self-recognition, the cause of autoimmune diseases;

Whereas a study by the American Autoimmune Related Diseases Association revealed that it takes the average patient with an autoimmune disease more than 4 years, and costs more than \$50,000, to get a correct diagnosis;

Whereas there is a significant need for more collaboration and cross-fertilization of basic autoimmune research;

Whereas there is a significant need for research focusing on the etiology of all auto-

immune-related diseases, to increase understanding of the root causes of these diseases rather than treating the symptoms after the disease has had its destructive effect;

Whereas the National Coalition of Autoimmune Patient Groups is a coalition of national organizations focused on autoimmune diseases working to consolidate the voices of patients with autoimmune diseases and to promote increased education, awareness, and research into all aspects of autoimmune diseases through a collaborative approach; and

Whereas designating May 2007 as “National Autoimmune Diseases Awareness Month” would help educate the public about autoimmune diseases and the need for research funding, accurate diagnosis, and effective treatments: Now, therefore, be it

Resolved, That the Senate—

(1) designates May 2007 as “National Autoimmune Diseases Awareness Month”;

(2) supports the efforts of health care providers and autoimmune patient advocacy and education organizations to increase awareness of the causes of, and treatments for, autoimmune diseases; and

(3) supports the goal of increasing Federal funding for aggressive research to learn the root causes of autoimmune diseases, as well as the best diagnostic methods and treatments for people with autoimmune diseases.

Mr. BIDEN. Mr. President, I am happy to join the esteemed Congressman from New York, Rep. STEVE ISRAEL, and submit a resolution today to declare May 2007 as “National Autoimmune Diseases Awareness Month.”

The purpose of the resolution is to raise awareness of autoimmune diseases and the need for aggressive research to learn the root causes of autoimmune diseases, as well as the best diagnostic methods and treatments for people with autoimmune diseases.

Autoimmune diseases are chronic, disabling diseases in which underlying defects in the immune system lead the body to attack its own organs and tissues. Autoimmune diseases can affect any part of the body—blood, blood vessels, muscles, nervous system, gastrointestinal tract, endocrine glands, and multiple-organ systems—and can be life-threatening.

Researchers have identified over 80 different autoimmune diseases, including multiple sclerosis, juvenile diabetes, Crohn's disease, scleroderma, polymyositis, lupus, Sjögren's disease and Graves' disease, and suspect at least 40 additional diseases of having an autoimmune basis. The National Institutes of Health estimates that autoimmune diseases afflict more than 23 million people in the United States. Seventy five percent of the people affected with autoimmune diseases are women, and the prevalence of autoimmune diseases is rising. However, the family of autoimmune diseases is under-recognized, and this poses a major health care challenge to the United States.

Diagnostic tests for autoimmune diseases are not standardized, which makes autoimmune diseases very difficult to diagnose. Because autoimmune diseases are difficult to diagnose, treatment is often delayed, resulting in irreparable organ damage and unnecessary suffering.

There is a significant need for more collaboration and cross-fertilization of
